MANAGEMENT DISCUSSION AND ANALYSIS REPORT

ECONOMY AN OVERVIEW

INDIA:

In the wake of a new Central Government, higher spending on gross capital formation, slowing inflation, lowering interest rates and crude oil price compared to the previous fiscal year, some sectors of the economy have started showing signs of revival and higher growth. Both fiscal and current account deficit remained relatively stable, which contributed to growth.

As adjusted for methodological revision in India's GDP calculation, GDP for Fiscal 2014 increased by 6.9% (compare to a previous estimate of 4.7%) and GDP for Fiscal 2015 increased by 7.3% (compared to a previous estimate of 5.5%). Growth in agriculture and industry decreased in Fiscal by 1.1% as compared to 11.1% in the same period. IIP growth has shown signs of revival based on increases in IIP between November 2014 to March 2015. IIP increased by 2.8% in Fiscal 2015 as compared to a decrease of 0.1% in Fiscal 2014. Significant factors influencing IIP growth in Fiscal 2015 included a 1.4% increase in the mining sector in Fiscal 2015 compared to a decrease of 0.6% in Fiscal 2014, and an increase in the manufacturing sector of 2.3%, compared to a decrease of 0.8% in Fiscal 2014. However, consumer durables continue to remain negative at 12.5% (negative 12.2% in Fiscal 2014) (Source: Ministry of Statistics and Programme implementation).

Due to fragile global economic situations the India exports were also impacted. India's exports dipped deeper in the negative zone recording a decline of 21% in March, 2015, the biggest fall in the last six years, pulling down the total shipment for 2014-15 to US \$310.5 billion, missing the annual target.

GLOBAL:

Global growth remains moderate with uneven prospects across the major economies. The outlook for advanced economies is improving, while growth in emerging market and developing economies projected to be lower, primarily projecting weaker prospects for certain large emerging market economies alongside oil and raw material exporting economies. Oil prices have declined during the year due to weaker than expected global activity and a weaker demand for oil against the available supply. Exchange rate movements in recent months have been sizable, reflecting changes in expectations about growth and monetary policy across major economies. Long-term government bonds yield have declined in major advanced economies, reflecting in part lower inflation, expectation the sharp decline in oil prices and weak domestic demand.

INDIAN EXPORTS:

Due to fragile global economic situations the Indian exports were also impacted. 2 Summary of significant accounting policies

i Basis of preparation

These financial statements have been prepared in accordance with the generally accepted accounting principles in India (Indian GAAP) under the historical cost convention on accrual basis. These financial statements have been prepared to comply in all material aspects with the accounting standards notified under Section 133 and other relevant provisions of the Companies Act, 2013. The accounting policies adopted in the preparation of the financial statements are consistent with those followed in the previous year.

All assets and liabilities have been classified as current or non-current as per the Company's operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Based on the nature of products and the time between the acquisition of assets for processing and their realisation in cash and cash equivalents, the Company has ascertained its operating cycle as twelve months for the purpose of current–non current classification of assets and liabilities.

ii Use of estimates

The preparation of the financial statements in conformity with Indian GAAP requires the Management to make estimates and assumptions considered in the reported amounts of assets and liabilities (including contingent liabilities) and the reported income and expenses during the year. The Management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Future results could differ due to these estimates and the differences between the actual results and the estimates are recognised in the periods in which the results are known/materialise.

iii Tangible Assets

Tangible Assets are stated at cost net of accumulated depreciation and accumulated impairment losses if any. Cost comprises cost of acquisition, construction and subsequent improvements thereto including taxes and duties (net of credits and drawbacks), freight and other incidental expenses related to acquisition and installation. Subsequent expenditure related to an item of fixed asset are added to its book value only if they increase the future benefits from the existing asset beyond its previously assessed standard of performance. Losses arising from the retirement of, and gains or losses arising from disposal of tangible assets which are carried at cost are recognised in the Statement of Profit and Loss.

iv Depreciation and amortization

Depreciation including amortization on fixed assets, is provided under Written Down Value Method (WDV) in accordance with Schedule II to the Companies Act, 2013.

v Borrowing Costs

Borrowing costs attributable to acquisition and / or construction of qualifying assets are capitalised as a part of the cost of such assets up to the date when such assets are ready for its intended use. Other borrowing costs are charged to Statement of Profit and Loss.

vi Export incentives

Export benefits are accounted for in the year of exports based on eligibility and when there is no uncertainty in receiving the same.

vii Inventories

Inventories are stated at cost or net realisable value, whichever is lower. Cost is determined on weighted average method and comprises expenditure incurred in the normal course of business in bringing such inventories to their present location and condition and includes, where applicable appropriate overheads. Obsolete, slow moving and defective inventories are identified at the time of physical verification and where necessary, provision is made for such inventories.

viii Foreign currency transactions and translations

Initial Recognition:

"On initial recognition, all foreign currencies transactions are recorded at exchange rates prevailing on the date of the transaction."

Subsequent Recognition

"At the reporting date, foreign currency non-monetary items carried in terms of historical cost are reported using the exchange rate at the date of transactions."

All monetary assets and liabilities in foreign currency are restated at the end of accounting period at the closing exchange rate. Foreign exchange difference on account of a depreciable asset, is adjusted in the cost of depreciable asset, which would be depreciated over the balance life of the asset. Exchange differences on reinstatement of all other monetary items are recognised in the Statement of Profit and Loss.

Forward Exchange Contracts:

Premium/discount on forward exchange contracts, which are not intended for trading/speculation purposes, are amortised over the period of the contracts if such contracts relate to monetary items as at the Balance Sheet date. Any profit or loss arising on cancellation or renewal of such a forward exchange contract are recognised as income or as expense for the period.

ix Revenue Recognition

Sale of Goods are recognised when the substantial risks and reward of ownership in the goods are transferred to the buyer as per the terms of the contract and are recognised net of trade discounts, rebates, sales taxes and VAT.

x Other Income

Interest Income is generally recognised on a time proportion basis taking into account the amount outstanding and the rate applicable, when there is reasonable certainty as to realisation. All other items are recognised on accrual basis.

xi Taxes on income

"Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the provisions of the Income Tax Act, 1961."

Deferred tax is recognised on timing differences, being the differences between the taxable income and the accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax is measured using the tax rates and the tax laws enacted or substantially enacted as at the reporting date. Deferred tax liabilities are recognised for all timing differences. Deferred tax assets are recognised only if there is virtual certainty that there will be sufficient future taxable income will be available against which these can be realised. Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the Company has a legally enforceable right for such set off. Deferred tax assets are reviewed at each Balance Sheet date for their realisability.

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax. Accordingly, MAT is recognised as an asset in the Balance Sheet when it is probable that future economic benefit associated with it will flow to the Company.

xii Provisions, contingent liabilities and contingent assets

"Provisions are recognised when there is a present obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and there is a reliable estimate of the amount of the obligation can be made. Provisions (excluding retirement benefits) are measured at the best estimate of the expenditure required to settle the present obligation at the Balance sheet date and are not discounted to its present value. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates."

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence/non occurrence of one/more uncertain future events not wholly within the control of the company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

A contingent asset is neither recognised nor disclosed in the financial statements.

xiii Earnings Per Share

Basic earnings per share is calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Earnings considered in ascertaining the Company's earnings per share is the net profit for the period. The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares, other than the conversion of potential equity shares, that have changed the number of equity shares outstanding, without a corresponding change in resources. For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

xiv Cash and cash equivalents

In the Cash Flow Statement, cash and cash equivalents includes cash in hand, demand deposits with banks, other short-term highly liquid investments with original maturities of three months or less.
