MANAGEMENT DISCUSSION AND ANALYSIS REPORT

This analysis report briefly describes about the company, the industry and developments, the current business environment and the ability of the company to avail opportunities, exhibit strength, handling of threats/weaknesses, financial performance, internal controls and other related issues.

ECONOMY AND MARKETS:

The year witnessed divergent growth globally, led by strengthening of the US economy, uneven and subdued growth in the Euro area and Japan coupled with a slowdown in Developing & Emerging markets.

In the domestic market, growth continued to be muted with the second successive year of sub 5% GDP growth. The year saw steep currency depreciation in an environment where industrial activity remained in contraction mode, consumption demand continued to weaken, while lacklustre capital goods production pointed to stalled investment demand.

With sluggish growth across the larger economy, further compounded by high consumer inflation and weak sentiment, market growth across FMCG categories moderated throughout the year in both volume and value terms. The discretionary categories and premium segments were particularly under pressure. The operating context for the year was challenging, given the backdrop of a market slowdown, a volatile input cost environment and heightened competitive intensity.

During the year under review, the monetary policy stance of the Reserve Bank of India (RBI) was driven by the imperatives of keeping inflation in check and supporting growth revival while managing a complex external economic situation. The RBI brought focus on the Consumer Price Index (CPI) following the steep fall in the value of Rupee. The target for inflation levels has been set at 8% and 6% for the current year and for the next financial year respectively. During the year, with a view to contain inflation, the RBI increased the Repo Rate by 75 basis points but lowered Cash Reserve Ratio by 25 basis points so that the liquidity does not come under pressure. As a result of all these factors, the interest rates remained high during the year and also witnessed steep peaks during the few months following the fall of rupee to its lowest ebb.

GDP growth rate (in terms of GDP at factor cost at 2004-05 prices) for 2013-14 remained the same at 4.7 per cent. The sub-5 per cent growth of the economy in 2013-14 was primarily the result of the slowdown in industry for the second year in succession, that registered a growth rate of 0.4 percent in 2013-14.

GDP Growth rate for 2014-15 is projected at 5.1 - 5.5 per cent. The higher growth of 5.5 per cent is conditional on pick upon investment spending. Between May 2013 and August 2013, the Indian Rupee depreciated by 16.3% on the back of a USD 12.6 billion capital outflow from India's domestic equity and bond markets.

Your Company's performance for the year 2013-14 has to be viewed in the context of aforesaid economic and market environment.

The first three quarters of 2013-14 saw the merchandise exports expanding 5.9 per cent while imports declined by 5.3 per cent and consequently trade deficit shrank 22.1 per cent. The lower trade deficit augmented by higher net earnings resulted in sharp decline in the current account deficit (CAD) in the first three quarters of 2013-14.

d Borrowing Costs

General and specific borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.
